NASA's GROVER, a remotely operated rover powered by durable SunPower® solar cells

Record-Setting Solar Technology

Efficiency matters

The same high efficiency solar technology powering pioneers across the globe is the same innovative technology that can help power a record of your own—lower electricity bills.

- SunPower® X-Series panels have efficiency ratings above 22%,⁴ producing more energy in the same space over the warranted life of the system compared to conventional panels⁹
- SunPower uses high grade n-type monocrystalline wafers and thick plated metal for superior efficiency

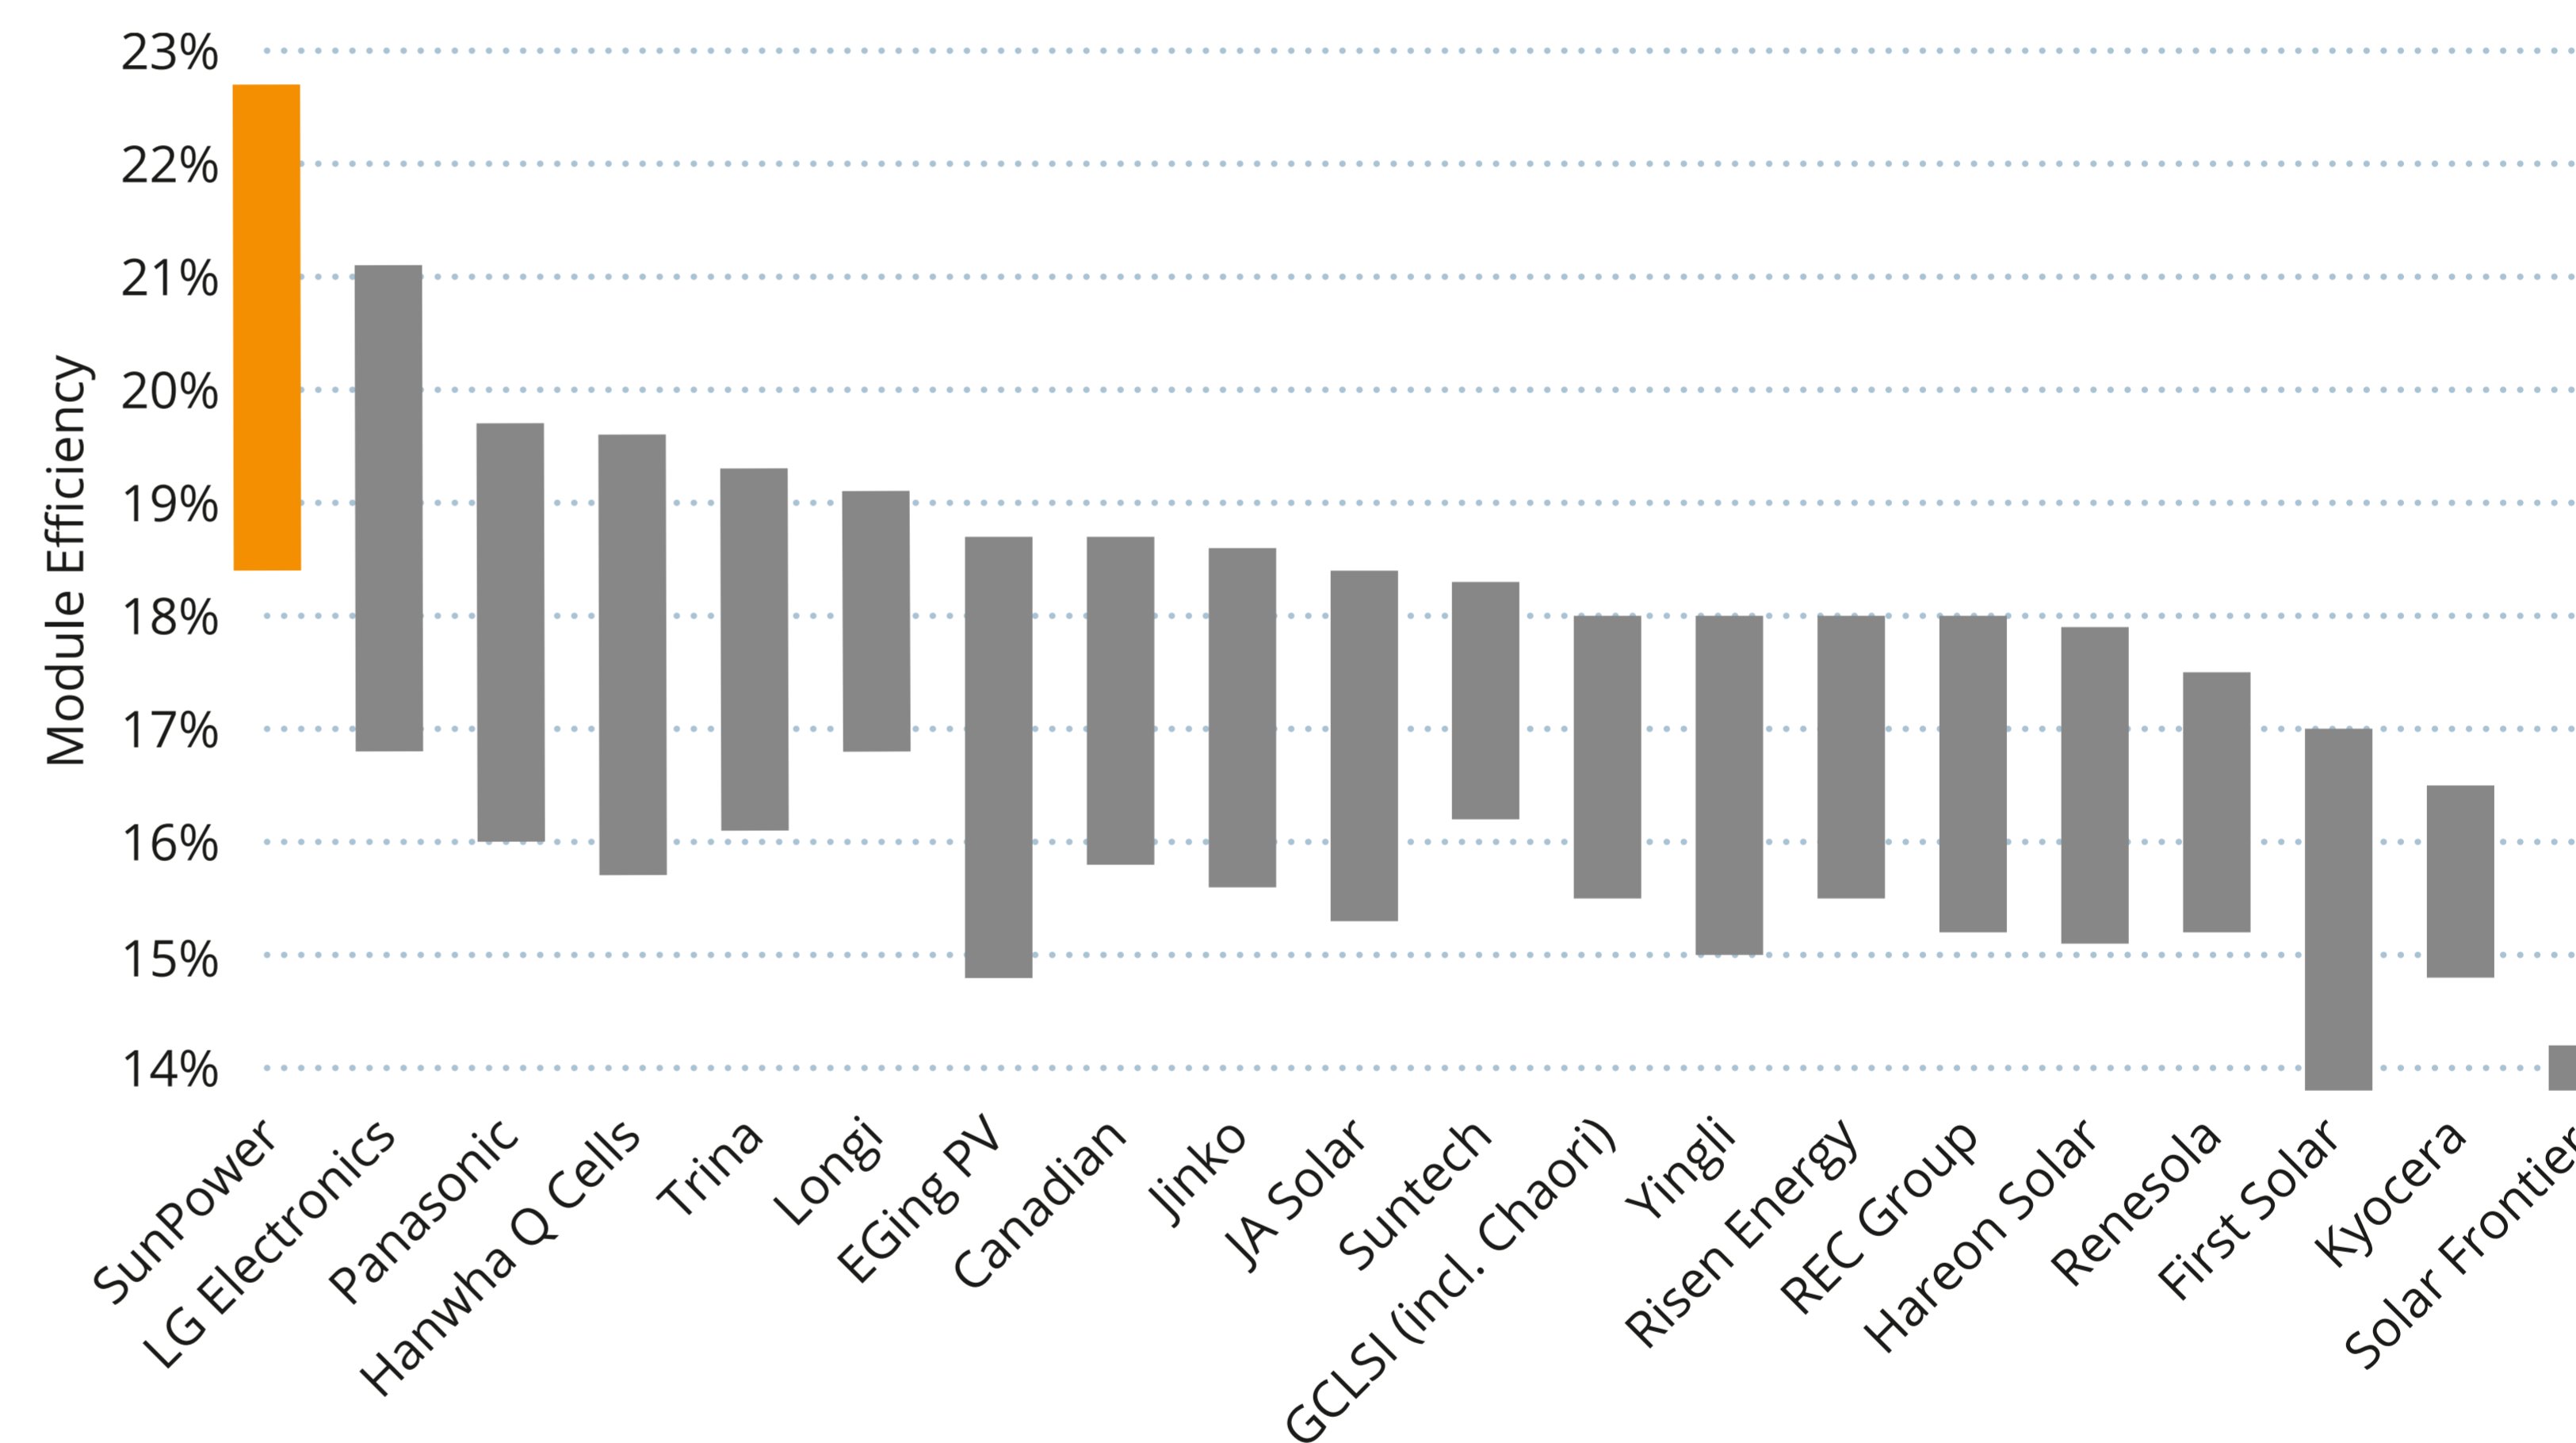

Diagram values compiled from manufacturer websites, January 2018.

WHAT YOU NEED TO KNOW

What is the efficiency of the panels you have been recommended?
