

Transform HVAC Assets into **Smart Machines**

The CATALYST and eIQ Platform offer commercial properties a cost effective solution for dramatically cutting operational costs while extending the life of HVAC equipment

At Transformative Wave, we have a unique approach to HVAC controls. With the CATALYST, the leading RTU retrofit product on the market, we produce a 25%-50% reduction in energy use. The CATALYST delivers “hard” verifiable energy savings that go beyond the typical operational savings that come from adding an Energy Management System. The eIQ Platform, our Advanced Rooftop Controls Package, delivers valuable real-time asset control, fault detection and diagnostics, and operational data that goes beyond traditional controls-based offerings as a result of our unique integration capabilities.

Customers Engaged	Energy Savings Estimates	CATALYST Return on Investment
Banking and Financial Institutions	Average of \$1,679 annual energy savings in SoCal	< 3 Years ROI
Electronics Companies	\$57,167 annual energy savings in Aurora, IL	< 2 Years ROI
Manufacturing	\$84,000 annual energy savings in Oregon	2.6 Year ROI
Higher Education	\$25,723 annual energy savings in Phoenix, AZ	< 2 Years ROI
Technology Companies	94,144 kWh - \$9,885 annual energy savings in Tucson, AZ	3.7 Year ROI

“Transformative Wave’s CATALYST neatly packages proven energy savings technologies in an easy-to-implement solution. It provides value not only with energy savings but fault detection/diagnostics, and control over previously uncontrolled areas. They work hard to vet projects and maximize available rebates.”
